

Light that conveys, surprises and gives color!

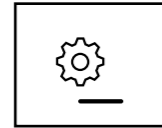

Solid Light combines the beauty of glass and the possibilities of light.

LED technology
in a wide array
of colors

lit on one side
and transparent
on the other

personalized
production

Using a well-studied chemical engraving system and LED technology, we give shape to light, creating a light screen effect.

The wide variety of colors available with LED light allows us to enhance and personalize furniture, interiors, spaces and buildings, creating unique, sustainable settings that use considerably less power.
